Hue

- Hue provides web interface to HDFS, Hive, Impala, Pig and Spark
- To connect to Hue
    - If you are not on campus, start VPN
    - Point your browser to
    - Hue - https://hadoop.rcc.uchicago.edu:8888
    - Use your usual university credentials
    - Personnally I would not use it and instead either submit job in batch or use jupyter notebook for spark
